

The Lighting Plan is posted in pelhamartfestival.com – menu item – Artists-Exhibitor Information–Booth Info 2019

Lighting Systems Suggestions

Short Term or Less Costly Lighting

KIGIGI is suggested for used lighting systems or Amazon for clip on lights with or without stems.

We do suggest using energy efficient bulbs.

Systems for the long term may be available more locally at:

Walmart, Rona, Home Depot, or Home Hardware for clip on lights to chain and connect, with an extension for the arena electrical panel as shown in the lighting examples you'll receive in your package. More expensive track light systems are available at Don's Lighthouse in St. Catharines.
