

The Lighting Plan is posted in [pelhamartfestival.com](http://pelhamartfestival.com) – menu item – Artists-Exhibitor Information–Booth Info 2020

## **Lighting Systems Suggestions**

### **Short Term or Less Costly Lighting**

KIGIGI is suggested for used lighting systems or Amazon for clip on lights with or without stems.

### **Systems for the long term may be available more locally at:**

Walmart, Rona, **Home Depot**, or Home Hardware for clip on or clamp lights to chain and connect, with an extension cord for the arena electrical panel as shown in the lighting examples you'll receive in your package. More expensive track light systems are available at Don's Lighthouse in St. Catharines.

LED light bulbs are 60 watt replacements required by the Meridian Community Centre for all artist lighting to screw into clip or clamp-on lights, or for use in track lighting available in grocery stores, hardware stores, Home Depot, Canadian Tire, and other big box stores.

The Hampton Bay 13-7/8 in Satin Chrome Clip Lamp with gooseneck is available at Home Depot for \$18.00 plus tax.

OR, the black Xtricity Desk Lamp with Clamp Base and Adjustable Gooseneck is at Amazon.
